# PERFORMANCE CARBON

## APPLICATIONS

Performance Carbon has been specially formulated for dissolving Calcium Carbonate deposits in plate heat exchangers and related equipment.

## METHOD OF USE

For this purpose, Performance Carbon is normally used at a concentration of between 5-15%. However the actual dose required varies depending on the type and amount of deposit. Ideally the product should be used at a temperature of between 20-60 Deg C.

## SAFETY PRECAUTIONS

Take normal precautions for handling strong acids. Do not mix with bleach or any products containing hypochlorite. For more detailed health and safety information, request a hazard data sheet.

**PACKAGING** :- 25 litre drums
