## PERFORMANCE PINE DISINFECTANTS QAP RANGE

### QAP 30 and QAP 100 Conform to BS 6424

**QAP 30** and **QAP 100** are highly active, pleasant pine smelling general purpose disinfectant concentrates. The QAP products utilize the modern Benzalkonium Chloride type biocide and contain no phenollic type biocides. The QAP's are neutral and non-toxic and therefore safe to use in the food industry. Both disinfectants conform to BS 6424.

To comply with labelling requirements for BS 6424 it is important that the maximum use dilution claimed on the label is the level at which the product passes the test:-

<b>QAP 30</b>	<b>30 times</b>
<b>QAP 100</b>	<b>100 times</b>

e.g. **QAP 30** can be used down to dilutions of 1:30 in water and yet still kill most bacteria and yeasts within minutes.

### METHOD OF USE

Heavily soiled articles should be rinsed clean before disinfection. Disinfectant solutions should always be freshly prepared.

**Standard Solutions:-** *QAP 30*. Dilute 1 part with 30 parts water.

*QAP 100*. Dilute 1 part with 100 parts water.

**Floors, Ledges, Tables etc:-** Mop floors, ledges and table tops with standard solution.

**Sickrooms:-** Soak equipment, laundry etc in standard solutions for a minimum of 1 hour.

**Sinks, Drains, Toilets:-** Use neat disinfectants on a daily basis in sinks, drains and toilet bowls. Wipe toilet seats with standard solutions.

### SAFETY PRECAUTIONS

When handling this product in its concentrated form gloves and eye protection should be worn. Wash off skin contact with plenty of water. In cases of eye contact irrigate with clean water and seek medical advice. Keep out of reach of children. Not to be taken internally. For detailed health and safety information, request hazard data sheets.
